

“Essentials for Data Quality”

**Data Quality Management Control Program
TRICARE Data Quality Course**

May 2011

Course Topics

- **Ambulatory Data Module (ADM)**
 - A Sub-System of CHCS
- **Visit Workload vs Encounter Services**
- **ADM and AHTLA Processes**
- **Coding Table Update Coordination**
- **Data Flows, Compliance and Errors! Oh My!**
- **“Tune-Up” Your Data !! And Performance**

Laboratory(ies): HGB A1C (Routine); LIPID PAI

USER, TEST in CHCSII Test Clinic at CHCSII ITT

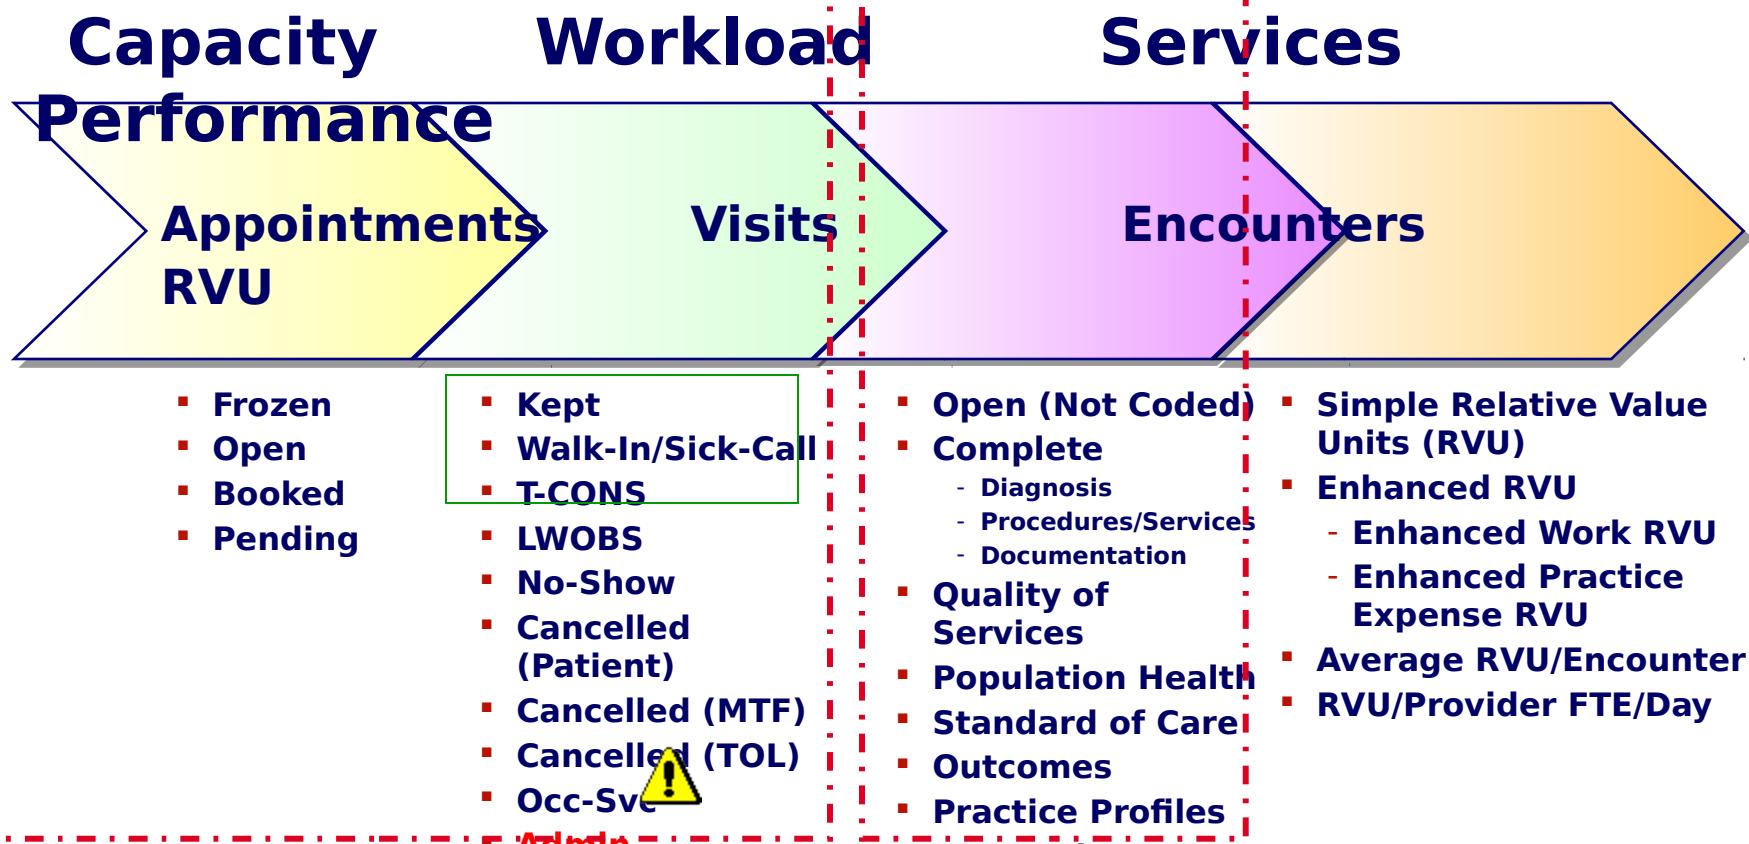

Objectives

- Recognize the increasing pressure to analyze and to utilize various data sources to measure health care related services, quality, costs, performance and outcomes.
- Focus on the practical skills needed to "Transform Data Into Action", utilizing clinical data from CHCS ADM (or M2)
- Outline business rules and analysis techniques that can be applied to the data to identify the consistency of underlying clinical processes, performance trends and various data capture/quality issues.

Capturing Clinical Services

Focus Shifting from “Counting Visits” to Measuring Work/Services Provided

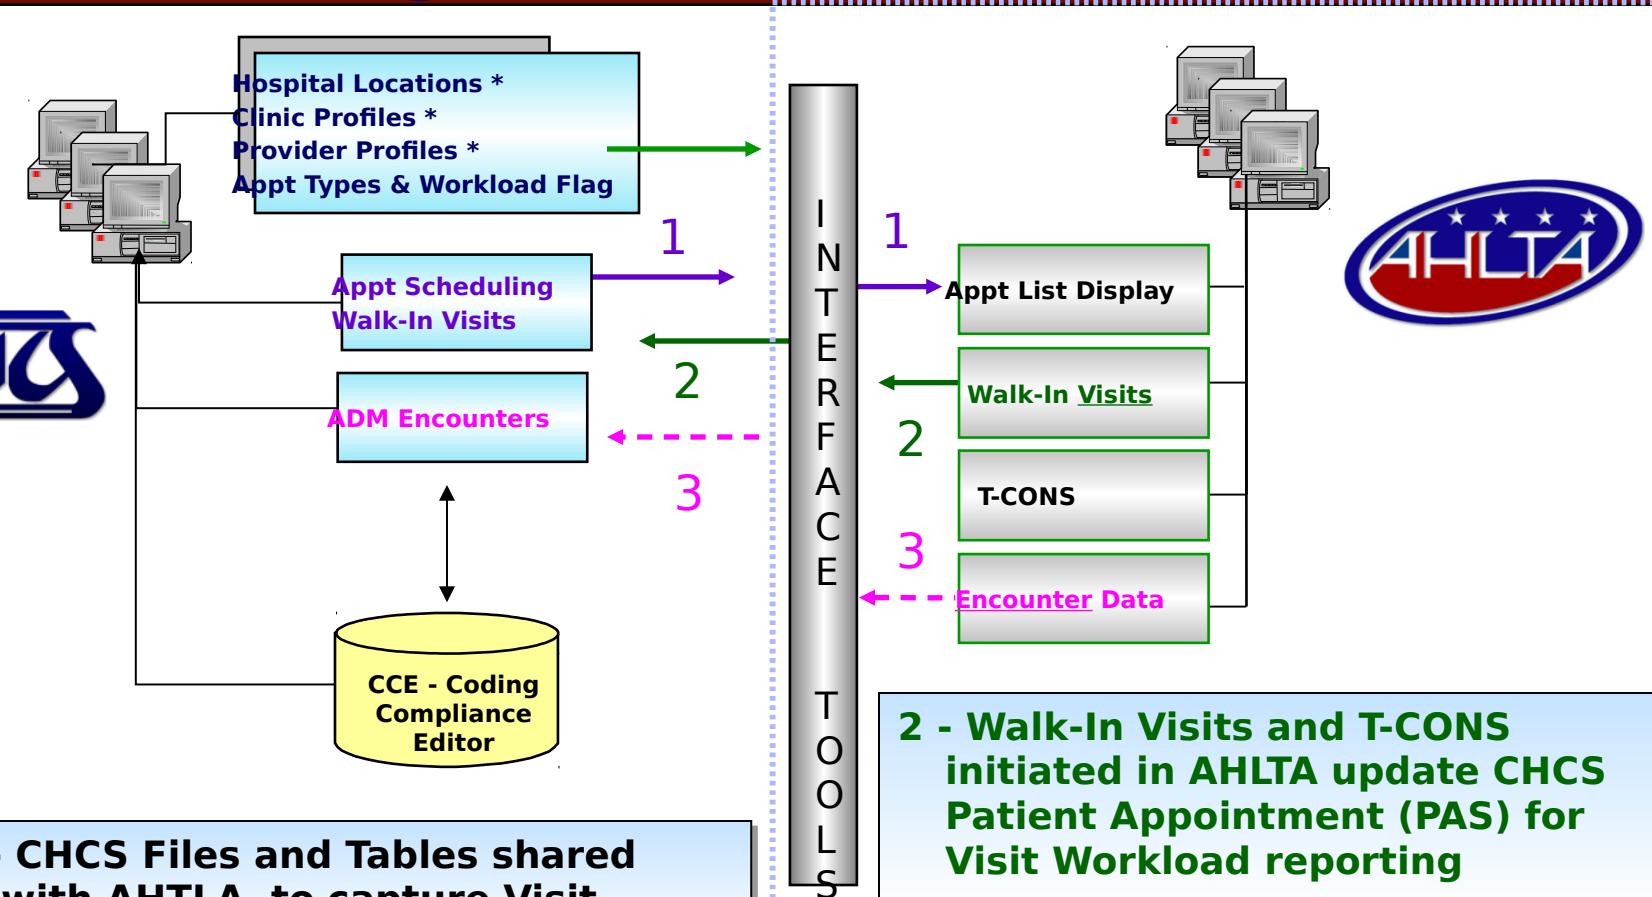

Visits vs Encounters

- An “**ENCOUNTER**” captures services provided:
 - Reason for seeking care
 - Where the services were provided
 - Level of Medical Decision Making/Complexity
 - Clinical services provided
 - Identifies Staff (By Name) providing the services
 - Provider Seen
 - Clinical Service
 - Provider Medical Specialty/HIPAA Taxonomy
 - Both COUNT and NON-COUNT Visits are Encounters
- **DQMCRL Statement C. 9. a):**
 - # SADR (count only)* encounters / # WWR visits

Visit/Encounter Data Flow

* - CHCS Files and Tables shared with AHLTA to capture Visit Workload and Encounter Services
1 - Scheduled Appointments and Walk-Ins sent to AHLTA

2 - Walk-In Visits and T-CONS initiated in AHLTA update CHCS Patient Appointment (PAS) for Visit Workload reporting
3 - Encounters completed in AHLTA update CHCS ADM
4 - Completed encounters sent to CCE for Audit Review/Update -> Billing Release

Encounter Data Elements

- **ICD-9-CM Coding - Why the Patient was seen?**
 - Chief Complaint and Diagnoses
- **CPT Coding - What was done to address the patient problem?**
 - Physician/Provider Services/Procedures that supports capture of RVU
 - Modifiers (explain additional details about the Service or Procedure)
 - Units of Service
- **HCPCS Coding - What additional services/supplies were provided?**
- **Evaluation & Management Coding (CPT Coding):**
 - Setting
 - Office, Inpatient Professional Services (IPSR), Emergency Preventive Service, Inpatient/Outpatient Consults, etc.
 - Level of Services
 - Complexity (Minimal, Low, Moderate, or High)
 - Age Band
 - Preventive Services/Wellness

Additional Details

- **HIPAA standard data elements:**
 - Cause of Injury (and associated elements)
 - Geographic Location of Injury (Motor Vehicle Accidents)
 - Pregnancy Related (and associated elements)
 - HIPAA Provider Taxonomy
- **Secondary Providers:**
 - Assisting, Supervising, Nursing, Para-Professional, etc.
- **Additional E&M Codes (up to 2 Additional E&M Codes)***
- **Diagnosis Code Priority (Links Procedure to Dx 1, 2, 3 and/or 4)**
- **CPT Code Units of Service (per CPT Code)***
- **CPT Code Modifiers (up to 3 - per CPT Code)***
- **Military Unique ICD-9 Codes (ICD-9 Code Extenders)**
 - V70.5 4 PRE-DEPLOYMENT EXAMINATION
 - V70.5 5 DURING DEPLOYMENT EXAMINATION
 - V70.5 6 POST-DEPLOYMENT EXAMINATION
 - V70.5 D PRE-DEPLOYMENT ASSESSMENT: DOCUMENTED ON DD2795
 - V70.5 E INITIAL POST-DEPLOYMENT ASSESSMENT: DOCUMENTED ON DD2796
 - V70.5 F POST DEPLOYMENT HEALTH REASSESSMENT (PDHRA): DOCUMENTED ON DD2900
 - V70.5 G GWOT/WOUNDED WAR EXAM
- **Encounter Disposition (Inpatient Services and Ambulatory Disposition Types)**

- Units of Service used as a multiplier for Enhanced RVU (Work and Practice Expense) calculations and Billing

Encounter Data Flow

- **CHCS-ADM serves as the local MTF operational data store for Ambulatory and Inpatient Professional Services based on:**
 - Clinical Encounter data entered directly into ADM
 - “Written Back” from Signed (Completed) AHLTA Encounter Notes
 - ADM can be used to update Encounter Coding - BUT!!! ADM does not update AHLTA
 - Updated from the Coding Compliance Editor (CCE)
 - CCE can be used to update Encounter Coding, but CCE does not update AHLTA
- **Prepares daily batch ASCII (Text) data extract files:**
 - Standard Ambulatory Data Record (SADR)
 - Comprehensive Ambulatory and Professional Services Record (CAPER) also known as the “SADR Re-Design” or Expanded SADR Extract
 - FY12 will fully transition to the CAPER
 - Coding Compliance Editor (CCE) Extract
 - Billing data extracts for:
 - Medical Services Accounting (MSA)
 - Third Party Outpatient Collections System (TPOCS)

Encounter Data Extracts

DATA ELEMENT	SADR	CAPER	BILLING
HIPAA standard data elements: Injury Related Cause Codes Geographic Location of Injury (Motor Vehicle Accidents) Pregnancy Related (and associated elements) HIPAA Provider Taxonomy	No No No Yes	Yes Yes No Yes	Yes Yes Yes Yes
ICD-9 Diagnosis Code (1-4)	Yes	Yes	Yes
ICD-9 Diagnosis Code (5-10)	No	Yes	Yes
Diagnosis Code Priority (Links Procedure to Dx 1, 2, 3 and/or 4)	Yes	Yes	Yes
CPT/HCPCS Codes 1-4	Yes	Yes	Yes
CPT /HCPCS Codes 5+	No	Yes	Yes
CPT/HCPCS Code Units of Service (per CPT Code)	No	Yes	Yes
CPT/HCPCS Code Modifiers (up to 3 - per CPT Code)	No	Yes	Yes
E&M (CPT) Code	Yes	Yes	Yes
Additional E&M Codes (up to 2 Additional E&M Codes)	No	Yes	Yes
Additional Secondary Providers	Yes	Yes	
Workload Flag (COUNT or NON-COUNT)	No	Yes	N/A
Source System Indicator (ADM or CHCS II)	Yes	Yes	N/A

Data Extract Processing

- **The SADR/CAPER is a daily batch extract ASCII (Text) File for each MTF DMIS ID that contains patient level data for:**
 - Ambulatory Clinic Encounters
 - Ambulatory Procedure Visits (APV) Encounters
 - Inpatient Consults (Not associated with the Attending Clinical Service)
 - Inpatient Attending Provider Professional Services (IPSR-RNDS*)
- **The SADR Nightly Process is scheduled in CHCS to run at ~2030 - 2130 each night:**
 - Includes ADM & AHLTA completed encounters
 - Includes ADM updates and updates received from AHLTA and CCE
- **Following the SADR Nightly Process, billable encounter services (that met the 3 Day Billing “Hold”) and CCE Review/Release to Billing, are sent by CHCS to:**
 - CHCS Medical Services Accounting (MSA)

SADR/CAPER Transmission

Divisions Producing SADR and TPOCS Data Extracts

Division	TPOCS	DMIS ID	Group DMIS ID
WOMACK AMC FT BRAGG NC	Yes	0089	0089
POPE HEALTH CLINIC	Yes	0634	0089
ROBINSON HEALTH CLINIC	Yes	7143	0089
USAOHC FT. BRAGG	Yes	0570	0089
OCC HLTH NSG, SUNNY POINT	Yes	0576	0089

JOEL AHC - FT. BRAGG	Yes	7286	0089
CLARK HEALTH CLINIC	Yes	7294	0089

ICD-9 Download Year: 2010

CPT-4 Download Year: 2010

- The ADM System Manager Menu controls which MTF Divisions and Clinic Locations on the CHCS Host Platform will produce a SADR Extract File
- When a new DMIS (Division) is added, the SADR Extract status must also be set
- The SADR Nightly Task will create a SADR Extract File for each DMIS (Division) listed

Coding Compliance

- **Timeliness is a key element of Data Quality**

DQMCRL B. 6. a)

- a) **What percentage of Outpatient Encounters, other than APVs, has been coded within 3 business days of the encounter?**
- b) **What percentage of APVs have been coded within 15 calendar days of the encounter?**

- **Ambulatory Encounter Compliance is based Business Days elapsed from the Date of the Encounter, until the record is Complete**
- **APV Compliance is based on Calendar Days**
- **AHLTA/ADM “Write-Back” errors have impacted Coding Compliance measures - Most issues now resolved**
 - Specific Clinics and/or Providers can also be impacted to different degrees, particularly when there are issues with the Local Cache Server Synch Manager or Providers continue to use obsolete ICD-9 and CPT Codes

ADM Reports Menu

- **From your CHCS Main Menu:**
 - Type “ADS” to access the Ambulatory Data Module (ADM)
 - ADM is a Secondary Menu Option
 - CHCS Secondary Menus allow access across CHCS Sub-Systems

STYL	User Prompt Style
1	Appointments with No ADM Records by Clinic

- Imported into Excel and matched with M2 encounters

Daily Compliance Reporting

Subject: ADM Compliance Reports for 14 & 15 Feb 11 (UNCLASSIFIED)

Classification: UNCLASSIFIED

Caveats: FOUO

1. ADM compliance rate for 14 Feb: 96.53% with 172 outpatient encounters open (noncompliant - close ASAP). See attached reports, AdmOpen, for open encounters by provider.

Highest number of open encounters:

BBAA GEN SURG CLNS	<u>35</u>
BALA OP NUTR	<u>25</u> (<u>SAME AS YESTERDAY'S REPROT</u>)
BGAR RHC	<u>23</u>
BEAA ORTHOPEDICS	<u>12</u> (<u>SAME AS YESTERDAY'S REPROT</u>)

2. ADM compliance rate for 15 Feb: 95.20% with 240 outpatient encounters open (must be closed by COB).

Highest number of open encounters:

BBAA CEN SURG CLNS	<u>39</u>
BEAA ORTHOPEDICS	<u>21</u>
BBFA ENT	<u>14</u>
BGAR RHC	<u>12</u>

3. Reports are completed for each workday (excluding Saturdays/Sundays/Federal Holidays) for KEPT, S-CALL & WALK-IN appointments -- does not include APVs, APUs, OBSs, T-CONS & IBWAs. IAW MEDCOM/MEDCEN policy one hundred percent (100%) of outpatient encounters (excluding APVs, APUs, OBSs & IBWAs) must be completed within three (3) business days of the encounter.

- Prepared by Clinical Operations Division
- Daily @ 0600
- Sent to all Departments

- Calculate difference between DATE LAST EDITTED-Date of Service
- Completed Encounters must have at least 1 ICD-9 Code

Interface Error Reports

1. AHLTA/ADM Write-Back Error Report (AHLTA Server)

- Coordinate with your AHLTA System Admin to run the report
- ASCII File of AHLTA Write-Back errors (Easily imported into Excel):
 - AHLTA encounter not accepted or received by ADM
 - SADR/CAPER not created
 - Encounter not sent to TPOCS, CCE or EAS
 - Impacts 3-Day Coding Compliance
 - Not all AHLTA WB Errors appear on the AHTLA/ADM Write Back Error Report
 - Some Encounters may have multiple Error conditions

2. ADM Interface Status of ADM Records Report (ADM Report)

- CHCS ADM Menu Option Report #5
- **Errors** – Encounter failed SADR edits – Not sent in SADR or to CCE

3. ADM SADR Error/Warning Report (ADM Sys Mgr Report)

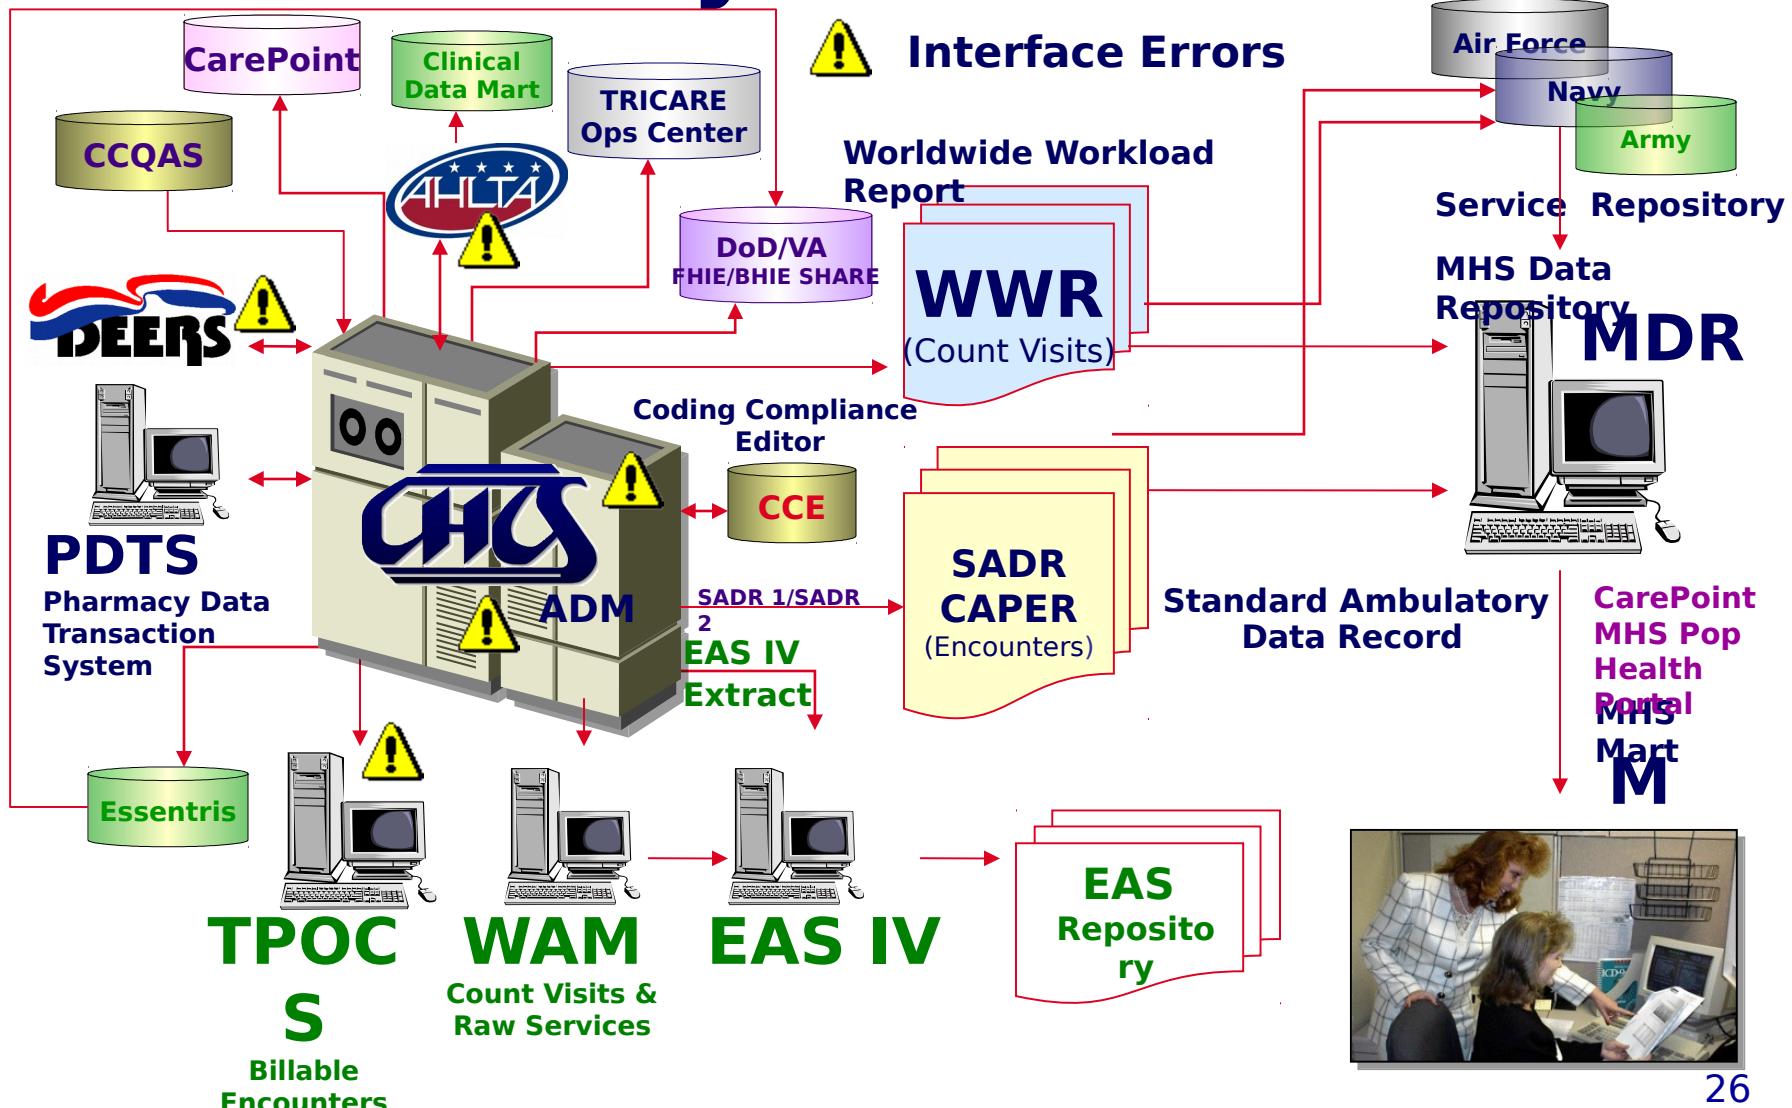

- Errors listed will prevent a SADR from being created
- Warnings will still be included in the SADR

4. CCE Detailed Interface Error Report (ADM Sys Mgr Report)

- CHCS Menu Option within ADM System Manager Menu Option
- Report of CCE functional errors
- ADM not updated to generate updated SADR
- Billable encounters not available to submit for billing

What Happened ??

- AHLTA User updated the Appt Status to No-Show or Cancel
- A CHCS User changed the status to **ADMIN** AFTER ADM included the Encounter in the SADR causing a 209 Error.
- Changing the Status to ADMIN AFTER the SADR is processed “breaks” key pointers in CHCS
- CHCS Appointment Audit Trail captured the updates....

CHCS APPOINTMENT AUDIT			
Many of the 209 errors are caused by this:

ADMIN Status - Same Day

- An Appointment can be set to ADMIN Status, using CHCS End of Day - ONLY if the ADMIN Status is set as of the same day as the Date of Service

CHCS APPOINTMENT AUDIT			
1	USER, CLINIC H	04 Apr 2011@1058	PENDING
2	MIDTIER, BRAGG	06 Apr 2011@1424	NO-SHOW
3	USER, UPDATE VISIT	06 Apr 2011@1912	ADMIN

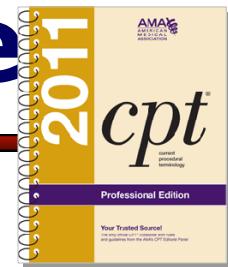

Duplicate Visits

- **Duplicate Visits identified the Same Day as the Date of Service, can be changed using CHCS End of Day to a Visits Status of ADMIN - IF changed on the Same Day**
- **If the Duplicate Visit is identified the next day, the only valid option is to change to MTF Cancel, as changing the Visit Status to ADMIN will result in a ADM Error 209, that cannot be resolved by either MTF Staff or Tier III Support for CHCS.**

Coding Table Update

- **CPT/HCPCS - Updated per Calendar Year**
 - **Effective 1 Jan**
 - MTF updates synchronized for AHLTA, CHCS and CCE
 - CPT/HCPCS automatically sent to TPOCS from CHCS
 - Use CHCS or M2 to identify Obsolete Codes used - to identify impact and reduce “Obsolete” ICD-9 Code Write-Back errors
 - Coordinate with Ancillary Areas (LAB/RAD) to update CHCS LAB/RAD Site Defined files and Radiology Procedure Groups

- **ICD-9 - Updated per Fiscal Year**
 - **Effective 1 Oct**
 - MTF updates must be coordinated for AHLTA, CHCS, CCE and TPOCS

Use CHCS or M2 to identify obsolete codes used - to identify impact and reduce “Obsolete” coding AHLTA Write Back errors

CHCS-ADM has been changed to support ICD-9 and CPT Coding validation, based on Date of Service - needed for Billing and CCE encounter coding updates

The “99499” Placeholder

- **June 2005:**

- E&M Code became optional for APV and encounters when at least 1 CPT/HCPCS Code was entered
- E&M Code was no longer required for NON-COUNT Visits
 - Remember! – IPSR RNDS* are NON-COUNT Visits
- TPOCS still requires the “99499” Placeholder

Current recommendation:

**Continue to enter the “99499” E&M Code Placeholder
in ADM**

- Effective Jan 2011, Consult E&M Codes are no longer valid
- Coders processing Encounter Coding Corrections

ADM Summary

- Identify one DQ Area to focus on the “Margin of Difference”:
 - Units of Service for Time-Based and Unit-Based Services
 - Consult E&M Codes
 - RN/Tech Scope of Practice
 - Allied and Mental Health Encounter Coding to prevent over-stated RVU
 - Encounters closed with Administrative ICD-9 Dx
 - Encounters closed with a Placeholder “99499” E&M Code and No CPT Coded services
 - Encounter completion compliance
